Academic Council Meeting No. and Date: 10 / April 26, 2025

Agenda Number: 3 Resolution Number: 46, 47/3.2, 3.7

Vidya Prasarak Mandal's B. N. Bandodkar College of Science (Autonomous), Thane

Syllabus for

Programme Code : BUBO Programme : Bachelor of Science

Specific Programme: Botany

(Major/Minor)

[T.Y.B.Sc. Botany] Level 5.5

CHOICE BASED GRADING SYSTEM

Revised under NEP From academic year 2025 - 2026

Preamble

The National Education Policy (NEP) 2020, unveiled by the Government of India, marks a significant paradigm shift in the country's educational landscape. Emphasizing holistic development and a student-centric approach, NEP 2020 aims to revolutionize the education system to meet the evolving needs of the 21st century. With its focus on early childhood care, universalization of education, and technology integration, NEP 2020 envisions an inclusive and equitable education ecosystem that fosters critical thinking, creativity, and innovation. By promoting multidisciplinary learning, vocational education, and flexible curriculum frameworks, NEP 2020 seeks to empower learners with the skills and knowledge necessary to thrive in a rapidly changing world. Furthermore, the policy lays a strong emphasis on teacher training, professional development, and accountability, recognizing educators as the cornerstone of educational reform. As India charts a new course in education with NEP 2020, it aspires to create a generation of empowered and enlightened citizens capable of driving social, economic, and cultural progress.

In the verdant landscapes of Thane, the midst of the bustling metropolis, Vidya Prasarak Mandal (VPM) stands as a bastion of educational enlightenment, a testament to the enduring legacy of Dr. V. N. Bedekar and the indomitable spirit of its founding members. Established in 1935 with a humble vision, VPM has since burgeoned into a sprawling educational conglomerate, catering to the scholastic needs of over 15,000 students across diverse disciplines, from kindergarten to post-graduation. Guided by Dr. V. N. Bedekar's visionary zeal and his son Dr. Vijay Bedekar, VPM has remained steadfast in its commitment to academic excellence and societal progress., Dr. V. N. Bedekar envisaged the creation of an "Island of Knowledge" in Thane, a sanctuary where the flames of learning would illuminate minds and ignite the torch of enlightenment. Within this hallowed institution, the Department of Botany took root in June 1969, with a singular mission to provide quality education to the rural youth and cultivate a deep appreciation for the wonders of the botanical realm. At the heart of the department's pedagogical philosophy lies a commitment to holistic education, characterized by a blend of theoretical rigor and practical application. The Bachelor of Science (B.Sc.) program in Botany, a cornerstone of the department's offerings, epitomizes this ethos, offering students a comprehensive curriculum that spans the breadth and depth of plant sciences.

Structured across six-month semesters, the B.Sc. program encompasses various subjects, including Bryology, Pteridology, Plant Physiology, and Molecular Biology, among others. Embracing an outcome-based approach, the curriculum is designed to equip students with technical proficiency, critical thinking skills, creativity, and a spirit of inquiry. Its unwavering commitment to research and innovation is central to the department's ethos. Encouraged to undertake projects, seminars, and field studies, students are provided with a fertile ground to explore their intellectual curiosity and contribute to the advancement of botanical knowledge. Through state-of-the-art research labs, instrumentation facilities, and computer labs equipped with GIS software, students are empowered to engage in cutting-edge research and address pressing environmental challenges.

Beyond the confines of the classroom, the department fosters a culture of experiential learning, organizing industry visits, internships, and guest lectures by eminent scholars and practitioners. These initiatives not only enrich the academic experience but also provide students with real-world insights and practical skills essential for success in their chosen careers. As graduates of the B.Sc. program in Botany, students are poised to embark on diverse educational and career pathways, ranging from advanced studies in plant sciences to research, government service, and entrepreneurship. Armed with a deep understanding of botanical principles and a passion for environmental stewardship, our alumni emerge as catalysts for change, driving innovation and sustainable development in their respective fields.

VPM's B.N.Bandodkar College of Science (Autonomous), Thane

PROGRAMME OUTCOMES (POs) OF BACHELOR OF SCIENCE (B.Sc.)

The Undergraduate Programmes of Science are intended to cater quality education and attain holistic development of learners through the following programme outcomes:

PO1 - Disciplinary Knowledge

Lay a strong foundation of conceptual learning in science. Instil ability to apply science in professional, social and personal life.

PO2 - Inculcation of Research Aptitude

Ignite spirit of inquiry, critical thinking, analytical skills and problem-solving approach which will help learners to grasp concepts related to research methodology and execute budding research ideas.

PO3 - Digital Literacy

Enhance ability to access, select and use a variety of relevant information e-resources for curricular, co-curricular and extracurricular learning processes.

PO4 - Sensitization towards Environment

Build a cohesive bond with nature by respecting natural resources, encouraging eco-friendly practices and creating awareness about sustainable development.

PO5 - Individuality and Teamwork

Encourage learners to work independently or in collaboration for achieving effective results through practical experiments, project work and research activities.

PO6 - Social and Ethical Awareness

Foster ethical principles which will help in developing rational thinking and becoming socially aware citizens. Build an attitude of unbiased, truthful actions and avoid unethical behaviour in all aspects of life.

Eligibility: Passed SYBSc. Botany (Major/Minor)

Degree Programme: B.Sc.

Level: 5.5

Duration: 3 years (Syllabus for Third Year semester V & VI)

Mode of Conduct: Offline lectures / online lectures.

Discipline/Subject: Botany

Specific Programme: B.Sc. BOTANY Qualification Title: UG certificate
Discipline/Subject: BOTANY

Program Specific Outcomes

| | Frogram Specific Outcomes | |
|----|---|----|
| 1. | To illustrate skills of identification and classification of different plants and gain a comprehensive understanding about their diversity, structure, function, ecology and economic or therapeutic importance. | L1 |
| 2. | To interpret the results of practical problems in areas such as plant identification, cultivation, conservation, and ecosystem management. | L2 |
| 3. | To apply laboratory techniques, critical thinking, scientific reasoning and analytical and entrepreneur skills through practical sessions. | L3 |
| 4. | To critically assess plant-related data and research findings to address challenges in agriculture, horticulture, ethno-botany, ethno-vetirinary, forestry, pharmaceutical industry and environmental conservation. | L4 |
| 5. | To design and conduct experiments in plant sciences, including tissue culture, genetic studies and ecological surveys, to generate innovative solutions. | L5 |
| 6. | To build a strong foundation to pursue higher studies in botany and related disciplines or enter professional fields such as teaching, research, horticulture, environmental management or industry. | L6 |

25BUBO5PE2

Practicals based on 25BUBO5TE2

COURSE OUTCOME

Students will be able to learn OR on completion of this course, students will be able to learn:

| CO 1 | Use the appropriate methods to extract essential oil and to prepare attar, gulab jal, hair oil, bath powder, candles and incense sticks using natural ingredients. | | | | |
|------|--|----|--|--|--|
| CO 2 | Prepare dhoop cones, resin incense, natural perfume, room freshener,potpourri, lip balm, floor cleaner, herbal-infused honey,scented handkerchiefs | | | | |
| CO 3 | Adapt eco-friendly, natural methods to develop skin care, body care, air purifying, plant pest resistant products. | L6 | | | |
| CO 4 | Compile all the data related to experiments | L6 | | | |

Grading will be as 3: High(>60%), 2: Moderate(40%-60%), 1: Low(<40%), 0: No

mapping

| | Name of the experiment |
|-----|---|
| 1. | Essential Oil Extraction & Natural Fragrance Creation |
| 2. | Cold Press Extraction of Citrus Oils |
| 3. | Traditional Attar Preparation |
| 4. | DIY Gulab Jal (Rose Water) Making |
| 5. | To infuse herbal extracts into oil for hair care. |
| 6. | To create an herbal bath powder from natural ingredients. |
| 7. | To make aromatic candles with essential oils. |
| 8. | To make natural incense sticks at home. |
| 9. | To recycle flowers into dhoop cones. |
| 10. | To make natural resin incense for purification. |
| 11. | To create a natural perfume using essential oils. |
| 12. | To prepare a chemical-free room freshener. |
| 13. | To prepare a natural potpourri for home fragrance. |

| 14. | To prepare a herbal lip balm. |
|-----|---|
| 15. | To make a natural floor cleaner. |
| 16. | To make herbal-infused honey. |
| 17. | To make naturally scented handkerchiefs. |
| 18. | To reuse waste flowers for fragrance extraction. |
| 19. | To prepare a natural skin care product by drying and grinding citrus peels. |
| 20. | To create eco-friendly dhoop cones using cow dung and herbal powders. |
| 21. | To make a natural face mask using multani mitti and herbal ingredients. |
| 22. | To create a chemical-free kajal using natural soot and oils. |
| 23 | To prepare traditional sindoor using turmeric and lime. |
| 24 | To create an organic pesticide using neem, garlic, and chili extracts. |

|----|---|----------------------------------|--------------------------|--|--|--|--|--|--|
| | Practicals based on 25BU5VSC01 | | | | | | | | |
| | | COURSE OUTCOME | | | | | | | |
| | Name of the experiment | | | | | | | | |
| 1. | Identifying Nutrients in Common Foods – Simple lab tests for proteins, carbohydrates, and fats. | | | | | | | | |
| 2. | Vitamin C Estimation – Le | mon and guava juice using iodin | e titration | | | | | | |
| 3. | Iron Content Detection – S | pinach, jaggery using color reac | tion tests | | | | | | |
| 4. | Extraction of Flavonoids – | From tea leaves or citrus peels | | | | | | | |
| 5. | Simple Cooking Experiment – Retaining nutrients (boiling vs. steaming) while cooking | | | | | | | | |
| 6. | Probiotic Fermentation – Making homemade curd or fermented foods | | | | | | | | |
| 7. | Extraction of Lycopene from tomatoes using simple solvent methods | | | | | | | | |
| 8. | Curcumin Extraction—From | m turmeric powder. | | | | | | | |

| 9. | Piperine Extraction-Black pepper |
|-----|---|
| 10. | Tannin Test—Tea vs. Pomegranate Peel Extraction. |
| 11. | Making Herbal Detox Water—Lemon, mint, Cucumber Infusion |
| 12. | Diet Chart Preparation—For different age groups (children, adults, elderly, and diabetic patients). |
| 13. | Making a Balanced Meal—Cooking with Fibre, Recipe—Using turmeric, black pepper, and Ginger |
| 14. | Making a High-Protein Snack—Sprouts salad, peanut chikki |
| 15. | Preparation of Omega-3 Rich Foods – Foods—Flaxseed chutney, fish recipes. |
| 16. | Homemade Natural Electrolyte Drink – Use coconut water, lemon, and salt. |
| 17. | Food Label Analysis – Understanding packaged food ingredients. |
| 18. | Making a Simple Collagen-Rich Drink—Using Fruit, Seeds, and Gelatin. |
| 19. | Preparation of a High-Iron Meal—Spinach dal, Ragi dosa |
| 20. | Making a Natural Sleep-Enhancing Drink—Warm Turmeric Milk and Chamomile Infusion |
| 21. | Energy-Boosting Smoothies—Peanut butter, banana, dates, and oats |
| 22. | Diabetic-Friendly Sweet Dish—Using Jaggery and Nuts |
| 23 | Prepare mint-lemon or cucumber-ginger infused water—observe flavour change after 2 hours. |

| I | Role of Ethnol Palgha docum Tradit manus Source intervir Biodiv and sur Application of the Ethnor fractur Use of preser Edible Bhoka Takala Plants examp (Ocim Introd Gandin Kalka infusio | ar, and Raignentation of mional methodical methodical methodical methodical methodical methodical medicines for restainable harvestainable harvestainable medicines for plants in vation and medicinar, Umbar, Phank (Martula, Kolused in cultudes): Banana mum sanctum), duction to Ayma's Pouch a (paste), Kwaton), Asava ection), Vati (1998). | ective, history ractitioners: Vertices of tribing and districts edicinal, food districts edicinal districts edicinal, food dis | vaidyas, tribal pes and rura (Warli, Ka, and ritual playledge transpectices (one example of traditional dents (fever, compest controlled in Maharan, Karavand) ious contexts isiaca), Coconsinensis (Shown and the complete of Tridos mulations - Son), Hima (confermented) | f ethnobotany medicine medicin | en/women les in Thane, a and Agri) ral traditions, d surveys and sacred groves , wounds-bone ity and seed Fruit, Charoli, Eliyati Chinch otra (Any five ucifera), Tulsi el leaf on Mahabhoota, oressed juice), o, Phanta (hot | 15 | | | |
| TT | Ethno-veterinary Science, Monographs and Pharmacology Definition, aim, objective, history, and scope of ethnoveterinary Role of traditional veterinary practitioners, cattle doctors, and pastoralists Traditional methods of treatment: decoctions, poultices, fumigation, oil | | | | | | | | | |
| II | Traditional methods of treatment: decoctions, poultices, fumigation, oil massages, and rituals Ethnoveterinary Plants in Maharashtra: Plants for livestock: Five examples Plants for poultry and birds: Five examples | | | | | | 15 | | | |

Plants for pets (dogs and cats): Five examples

Preparation and application: decoctions, paste, powder, fresh leaves as fodder.

Introduction to Animal Feed Preparation, Importance of nutritious, low-cost, and sustainable feed. Use of agricultural by-products, plants, and safe kitchen/slaughterhouse waste.

Tribal veterinary practices: traditional remedies and modern relevance

Monographs of Crude Drugs:

Monograph Details Covered: Biological source, geographical distribution, common varieties, Macroscopic and microscopic characters, chemical constituents, therapeutic uses, common adulterants of Strychnos seeds (*Strychnos nux-vomica*), Senna leaves (*Cassia angustifolia*), Clove buds (*Syzygium aromaticum*), Garlic (*Allium sativum*), Acorus calamus (*Vekhand*) and Turmeric (*Curcuma longa*)

Introduction to Pharmacology:

Basics of pharmacology: pharmacodynamics and pharmacokinetics
Preclinical trials: animal studies, toxicity, dose determination
Clinical trials: Phase I (safety), Phase II (efficacy), Phase III (large-scale studies & approval)

Contemporary Issues: Expert lectures, YouTube Videos, Animations, NPTEL, MOOC videos, and online seminars –webinars for strengthening the subject matters.

Self-study: Self Notes preparation using the departmental library, College Library

Pedagogy: Seminar, Quiz, Debate

Regional Language: Experiment discussion, doubt session

| | R COURSE :25BU6VSC01 | (02 Credits) | No of lecture in Hrs. 45 | | | |
|-----|--|---|-----------------------------|--|--|--|
| | Practica | als based on 25BU6VSC0 | 1 | | | |
| | Name of the experiment | | | | | |
| 1. | - | rom Plants- Use leaves of Nee lent spray. | m, Tulsi, and Lemongrass to | | | |
| 2. | | Longevity: Keep fresh-cut flow | ers in different solutions | | | |
| 3. | Natural Plant Perfume (Essential Oil Extraction)- Crush rose petals, jasmine, or lavender and heat them in water | | | | | |
| 4. | Growing Plants Without So | Growing Plants Without Soil (Hydroponics at Home) | | | | |
| 5. | Natural Sunscreen from Pla | Natural Sunscreen from Plant Extracts | | | | |
| 6. | Making Herbal Tea Bags | | | | | |
| 7. | Preparation of Organic Jaggery | | | | | |
| 8. | Making Fruit-Based Vinegar | | | | | |
| 9. | Preparation of Herbal Bath | Preparation of Herbal Bath Powder (Ubtan) | | | | |
| 10. | Making Farm-Based Bio-Enzyme Cleaners | | | | | |
| 11. | Preservation of Fruits & Vegetables Using Sun, Shade, and Oven Drying | | | | | |
| 12. | Extraction of Natural Gum | from Trees | | | | |
| 13. | Study of Indigenous Agro- | Based Handicrafts | | | | |
| 14. | Identification of Wild Edib | le Plants and Their Uses | | | | |

| 15. | Preparation of Herbal Tooth Powder |
|-------|--|
| 16. | Homemade Probiotic Drink (Fermented Rice Water) |
| 17. | Making Wild Edible Plant Dishes |
| 18. | Making Jaggery-Based Sweet Dishes |
| 19. | Making Fresh Butter & Buttermilk |
| 20. | Traditional Chulha Cooking Experience |
